

Press release.

cablex takes over resources and employees of Josef Vogt AG.

cablex continues to grow at the beginning of 2022 and strengthens its civil work unit. cablex can therefore increase its flexibility in the market in future and expand its range of products for customers.

As of 1 February 2022, cablex AG will take over the assets and employees of Josef Vogt AG, based in Kleindöttingen AG.

The Josef Vogt AG maintenance depot in Tegerfelden AG will continue to be managed by Beat Rohner and used by cablex as an additional civil work site in northern Switzerland.

Continuing a success story.

Josef Vogt AG, based in Kleindöttingen, was founded in 1973. Since then, the company has developed steadily and made an excellent name for itself in the civil engineering and pipeline construction market. Business owner Astrid Rohner-Vogt has now decided to step back and place her life's work in the hands of cablex.

"It's really satisfying for me to know that all employees and the machinery and vehicle fleet are in good hands at cablex," says Astrid Rohner-Vogt. Daniel Binzegger, CEO of cablex, is also very happy. "We want to further strengthen our civil work activities throughout Switzerland, because this business area is extremely important for our activities in the Swiss market. It will help us to plan more flexibly and offer our customers an even more extensive range of services."

1 February 2022
